CARVES

Where Accuracy Builds Confidence

About Us

CARVES is a leading producer, processor, and exporter of organic and conventional herbs, spices, and essential oils, delivering premium-quality products from Egypt to global markets.

Established in 2024 and backed by many years of industry experience, CARVES combines deep agricultural expertise with modern processing technology to offer a wide range of carefully selected herbs, spices, and essential oils that meet international quality standards.

Quality is at the heart of everything we do. From cultivation to final packaging, every product is rigorously tested against strict industrial and medical parameters to ensure purity, safety, and consistency. Our reputation is built on reliability, transparency, and long-term partnerships.

CARVES works closely with certified growers managing over 1,000 hectares of pure, clean, and organically cultivated land, fully compliant with EU organic regulations. This allows us to maintain complete control over the supply chain and guarantee traceability from farm to shipment.

To better serve our customers and reduce lead times, CARVES operates a large, advanced processing facility capable of delivering all required cut sizes and customized specifications. Our experienced export team ensures fast communication and professional support, responding to inquiries promptly—often within the same business day.

CARVES is certified according to EU Organic and NOP standards and holds ISO 9001, ISO 22000, and FDA certifications. All packaging materials are food-grade certified, and HACCP standards are strictly applied to ensure safe, hygienic, and high-quality products.

Vision

- ***To position CARVES as a world-class reference in organic herbs, spices, and essential oils, recognized for exceptional quality, refined sourcing, and a deep respect for nature***

Mission

At CARVES, our mission is to craft and export premium organic and conventional herbs, spices, and essential oils through meticulous sourcing, advanced processing, and uncompromising quality control.

We are dedicated to delivering refined natural products that meet the highest international standards, while fostering exclusive, long-term partnerships built on trust, excellence, and sustainability.

CARVES

Where Accuracy Builds Confidence

Our Values

Uncompromised consistency in quality, delivering the same excellence in every harvest, every process, and every shipment.

A partner you can rely on—trusted supply, timely delivery, and transparent communication at every step.

Smart, streamlined operations designed to reduce lead times and maximize performance without compromising quality.

- 07** *Processing, Packaging, and Exporting Control – State-of-the-art facilities maintaining hygiene, quality, and consistency.*
- 08** *Quality Control & Assurance – Rigorous testing ensures every product meets international safety and potency standards.*

Our commitment to you

We are committed to securing our sources of supply and maintaining full control over the entire process—from seeding to export—ensuring premium-quality products delivered with consistent value and competitive pricing.

- **Quality**

Quality is not just a standard—it's our top priority. Every product undergoes rigorous multi-level testing, from the moment the seed touches the soil to the moment the product reaches your warehouse. We control the entire process to ensure purity, potency, and perfection in every batch.

- **Analyses**

Every batch of our products is meticulously tested for pesticides, microbiology, PATA, ETO, glyphosate, DNOC, heavy metals, perchlorate, oil content, and aflatoxin. We leave nothing to chance, ensuring that every product meets the highest international safety and quality standards.

Social responsibilities

As part of our social responsibility, we believe that fostering a healthy, supportive, and empowering environment for our farmers and workers is just as important as the quality we deliver to our customers.

Rather than offering short-term assistance, CARVES is committed to long-term community development initiatives that create lasting impact and sustainably improve livelihoods.

Environment sustainability

We cultivate our lands with care, using crop rotation and organic practices to maintain soil fertility and regenerate ecosystems.

Our farms and operations are designed to preserve biodiversity, reduce carbon footprint, and proactively adapt to climate change.
